

## **QUALITY OBJECTIVE & POLICY**

### **OUR COMPANY QUALITY OBJECTIVE**

*The Company objective is to constantly enhance the reliability of its products and to keep a close and responsive contact with its customers. Maintaining cost competitiveness and quality on the market is important. The Company's investment policy is continuing in order to offer high value added and new generation products and ensures a better service to its customers'*

### **QUALITY POLICY**

*Our quality policy is to manufacture and supply products and services that meet our customers' requirements. Our investment policy in sophisticated machines and personalised moulds enable us offering more added value products.*

*As an ISO 9001 certified company since 2002, we continually upgrade our activities through review of Quality Management System by analysing risk and opportunities and setting quality objectives for continual improvement.*

*We ensure compliance with the legal regulations applicable for our industry sector as well as any other requirements specified by customer.*

*Our employees represent a major asset in our organization. Through their contribution and team work, we are confident that their output will continue to enhance customer's satisfaction. We are proud of being aware of environmental issues by using food grade raw material and recyclable plastic. We conduct our business professionally in line with the expectations of our stakeholders.*
